

**GermLogic™**

# THE COMPLETE CLEAN SOLUTION

## ABOUT GERMLOGIC

GermLogic provides advanced and comprehensive solutions that help businesses and private individuals combat the viruses, bacteria, mold and fungus that can develop in the air, on surfaces and on hands.

Microbes, like bacteria, fungi, viruses and algae, are able to grow in environments of all types and on surfaces of all kinds. Some of these microbes contribute to odors, discoloration and mildew. Some are pathogenic and can cause illness.

Today, it is important to go beyond what is visible to the naked eye and control germs on a microbial level.

GermLogic's antimicrobial solutions destroy microbes mechanically and prevents the breeding of superbugs - all while protecting against 99.99% of common illness-causing pathogens for up to 90 days.

We believe our comprehensive approach to deep sanitation is helping redefine clean. In the process, the safety of facilities, the health of customers and the well-being of the general public can be protected.

# AIR

## COMPREHENSIVE CLEAN AIR SOLUTION

There is hardly anything more essential than the air we breathe. Yet most organizations focus on surface cleaning - ignoring the air - potentially to the harm of their clients, staff or family members.

GermLogic offers a cohesive approach that helps you go beyond surface clean. From air purifiers, to sanitation in HVAC systems, to facility-wide treatment aimed at deodorizing and improving air quality.

## PURIFIERS

We offer commercial grade air purifiers that remove up to 99.97 percent of harmful germs, allergens and particulates from the air with ease and efficiency.

## GERMICIDAL UVC EMMITERS

Our advanced UVC HVAC Sanitation systems work around the clock to destroy harmful biofilm buildup while improving HVAC efficiency and reducing maintenance costs.

## FACILITY TREATMENTS - HEAT/UVC

GermLogic's expert deployment of cutting edge methods like Thermal Heat Remediation and UVC Sanitation can be used to simultaneously destroy pathogens in the air and on surfaces without the application of chemicals.

# SURFACE

## **CLEAN SURFACE TREATMENTS**

GermLogic's surface treatments destroy microbes, protect long for long periods and deodorize, and include large-scale surface treatments for facilities, hand-held antimicrobial applications for smaller areas and germ-destroying methods implemented into the manufacturing process.

## **BIOLOGIC**

Our BioLogic products are available for direct sale and allow you to sanitize at a whole new level. These products both eliminate and provide long-lasting surface protection from bacteria and viruses for up to 90-days. This dismisses the need for daily chemical disinfectants - simultaneously saving money and improving sanitation at your home or business.

## **FACILITY TREATMENTS**

We offer regular, facility-wide treatments that take the guesswork out of sanitation and provide ease of mind. Our experienced team will provide detailed service to your facility, destroying a wide range of germs while discouraging their future growth and helping prevent the breeding of resistant superbugs. We also provide odor elimination solutions that help keep facilities smelling clean by actually destroying the odor-causing microbes, not merely covering them up.

## LONG TERM HAND PROTECTION

Clean hands are a fundamental component of staying healthy. Safely and comfortably removing germs from the hands is a simple and important way to protect people from serious illness.

# HAND

## ANTISEPTIC LOTIONS

With GermLogic's Antiseptic Lotion, users receive a complete hand hygiene solution that doesn't just avoid skin irritation - it actually moisturizes and heals the skin while providing long-lasting protection against illness-causing bacteria and viruses for up to six hours.

## SANITIZERS AND SURGICAL SCRUBS

For single purpose applications, GermLogic offers Antiseptic Foaming Soap and Surgical Scrubs. They are ideal for use in hospitals, schools, businesses and homes. By protecting for extended periods, these products decrease usage - lowering costs and reducing skin irritation.

## INDUSTRIES WE SERVE

- HOTELS
- SCHOOLS
- HOSPITALS
- ASSISTED LIVING
- GOVERNMENT BUILDINGS
- SPORTS & FITNESS
